

# **Mechanics of Materials I:**

## **Fundamentals of Stress & Strain and Axial Loading**

Dr. Wayne Whiteman

Senior Academic Professional and Director of the Office of Student Services  
Woodruff School of Mechanical Engineering

## Module 9 Learning Outcome

- Define/Discuss Stress-Strain Diagrams

# Axial Centric Loading

## Normal Stress

Force per unit area  
perpendicular to the cut surface

## Nominal Stress (Engineering Stress)

$$\sigma = \frac{N}{A_o}$$

## True Stress

$$\sigma = \frac{N}{A}$$

## Normal Strain

Elongation per unit length

## Nominal Strain (Engineering Strain)

$$\varepsilon = \frac{\delta}{L_o}$$

## True Strain

$$\varepsilon = \frac{\delta}{L}$$
